

Muhammad Rizki Firmansyah

Product Engineer & Backend Developer

rizkifirmansyah2642@gmail.com | Greater Yogyakarta / South Jakarta, Indonesia | [linkedin.com/in/mrizkifirmansyah](https://www.linkedin.com/in/mrizkifirmansyah) | github.com/Kokonumbawan23

PROFESSIONAL SUMMARY

Product engineer and backend developer building payment and partner-commerce services with Java (Spring Boot) and Angular at AstraPay. Experienced in biller integrations, reconciliation and settlement, and Java 11-to-25 modernization. Also worked with Node.js, PHP, and Flutter.

CORE SKILLS

Backend: Java (up to 25), Spring Boot, Node.js, PHP (Laravel), REST APIs

Frontend & Mobile: Angular (up to 20), Flutter, HTML/CSS

Databases & Data: PostgreSQL, MongoDB, Data Studio dashboards

Infrastructure & Tools: Server Side Web Infra, nginx, deployment YAML, Git

WORK EXPERIENCE

Product Engineer

PT Astra Digital Arta (AstraPay), South Jakarta, Indonesia | Apr 2025 - Present

- Built Spring Boot backend services and Angular web apps for partner commerce in the AstraPay ecosystem, coordinating with external technical partners and internal teams on API integration and system availability.
- Built Biller Open API flows: status sync, callback-independent payment status, standardized error mapping, and reconciliation, settlement, and refund processing with billers.
- Shipped fee and pricing management (partner charge, convenience fee, final-price listing) and end-to-end Sharia merchant support, from onboarding to zakat, infaq, and wakaf products.
- Led the Mitra service migration from Java 11 to 25 (Spring Boot 2.7.18, MapStruct, MockitoBean) and upgraded the admin and dashboard web apps to Angular 20.
- Delivered partner dashboard features (scheduled sub-partner access, 30+ day history filters), optimized inquiry queries, and built Data Studio dashboards for partner performance.
- Wrote architecture spikes for biller product sync and fee management; now hardening security with public/private endpoint separation and service-to-service authorization.

Back End Developer

Berijalan (member of Astra), Yogyakarta, Indonesia | Jan 2025 - Feb 2025

- Developed backend features and API endpoints for enterprise systems, working on an omnichannel messaging platform and a chatbot service.
- Improved existing APIs to meet business needs and fixed issues found across development, staging, and production environments, collaborating with other developers to release changes.

Software Engineer

Widya Robotics, Sleman, Yogyakarta, Indonesia | Feb 2024 - Jun 2024

- Engineered software solutions and integrated backend services for AI & Robotics products.

Laboratory Teaching Assistant

UPN "Veteran" Yogyakarta, Indonesia | Jul 2022 - Feb 2024

- Guided undergraduate students in practicum coursework covering software engineering principles, algorithms, and practical programming labs.

EDUCATION

Bachelor of Informatics, UPN "Veteran" Yogyakarta | 2020 - 2024

Physical Sciences (IPA), SMA Negeri 11 Yogyakarta | 2017 - 2020

CERTIFICATIONS

Cloud Computing Full Graduate, Bangkit Academy

Junior Web Developer, BNSP / Professional Cert

LEADERSHIP & DEVELOPMENT PROGRAMS

Bangkit 2023 Cohort (Cloud Computing), Bangkit Academy | Feb 2023 - Jul 2023

Back End Development Member, IT Club UPN | May 2022 - May 2023

Human Resources Staff, BEM FTI UPN Yogyakarta | Mar 2021 - Apr 2023
